End of Term 3 Examinations

CYCLE

3

Overview

The Cycle 3 End-of-Term English Language assessments are designed to reflect the curriculum, ensuring systematic coverage of Reading and Viewing, in addition to Writing & Representing for Grade 12. The exams focus on reading fluency, comprehension, and vocabulary development, while also assessing students' ability to produce structured, coherent writing across a range of text types. Grammar and functional language are also embedded within tasks to evaluate how well students apply language structures in context rather than in isolation. By aligning with the grade-level learning outcomes, the exams provide teachers with reliable evidence of students' strengths and areas for support, helping to inform instruction and guide learning in subsequent terms.

Structure

Centralised

Grades 9-11: The assessment is divided into three parts:

- **Part 1 – Vocabulary:** Assesses skills toward Grade Level Goal.
- **Part 2 – Grammar** Targets working at Grade Level Goal.
- **Part 3A – Reading:** Targets working toward Grade Level Goal
- **Part 3B – Reading:** Targets working at Grade Level Goal
- **Part 3C – Reading:** Targets working beyond Grade Level Goal

Working toward Grade Level Goal	✓		✓		
Working at Grade Level Goal		✓		✓	
Working beyond Grade Level Goal					✓

Grade 12: The assessment is divided into four parts:

- **Part 1 – Vocabulary:** Assesses skills toward Grade Level Goal.
- **Part 2 - Grammar** Targets working at Grade Level Goal.
- **Part 3A – Reading:** Targets working at Grade Level Goal.
- **Part 3B – Reading:** Targets working beyond Grade Level Goal
- **Part 4 – Writing:** Targets working at Grade Level Goal

Working toward Grade Level Goal	✓				
Working at Grade Level Goal		✓	✓		✓
Working beyond Grade Level Goal				✓	

Curriculum Alignment

The Cycle 3 English Language assessments are fully aligned with the curriculum, which is structured around the domain of Reading and Viewing. Grammar, Functional Language, and Vocabulary—are embedded throughout the assessments to support progression across both domains and to reflect real-world communication. The assessments are mapped to CEFR proficiency levels, mirroring the curriculum’s emphasis on inclusion, differentiation, and learner autonomy within a structured continuum of learning. In line with the curriculum, assessment tasks also integrate global competencies, providing opportunities for students to demonstrate critical and creative thinking, well-being, ethical and intercultural understanding, as well as digital and financial literacy and sustainability awareness. This alignment ensures that assessments not only measure literacy skills but also reinforce the broader aims of the curriculum.

Question Types

SENTENCE CLOZE (VOCAB)

Students are given a bank of words and must select the correct ones to complete a set of sentences. The word bank contains more words than there are gaps, so students must read carefully and use their understanding of meaning, collocation, and context to choose appropriately — and to rule out the distractors they do not need.

early late silent noisy hungry tired

1. She went to bed _____ because she had school the next morning.
2. The library was very _____, so everyone was able to study easily.
3. After playing football for two hours, the children were very _____.

MULTIPLE-CHOICE GAP FILL (VOCAB)

Students read a series of sentences, each containing a gap, and choose the correct word from three options (A, B, or C). Options are carefully selected to test precise vocabulary knowledge, often featuring words that look or sound similar, making it essential that students understand exact meaning and usage rather than guessing from recognition alone.

1. The company's new strategy proved highly _____, attracting investors from around the world.

A effective
B affective
C infected

MULTIPLE-CHOICE GAP FILL (GRAMMAR)

Students read a short text with several gaps and select the correct word or phrase from three options (A, B, or C) to complete each one. This task requires students to apply their grammatical knowledge in context — understanding how tense, form, and structure function within connected, meaningful text rather than in isolated sentences.

Urban farming **1** _____ increasingly popular over the past decade. Many city dwellers now grow their own vegetables on rooftops or in community gardens. If more people **2** _____ this approach, local food supplies would become far more resilient.

1.
A becomes **B** has become **C** had become
2.
A would adopt **B** adopted **C** have adopted

Question Types

TRUE, FALSE, NOT GIVEN

Students read a text and assess a series of statements, deciding whether each one is confirmed by the text (True), contradicted by it (False), or simply not addressed (Not Given).

The blue whale is the biggest animal ever known to have lived on Earth. An adult can reach up to 30 metres in length and weigh as much as 200 tonnes. Despite their immense size, blue whales feed almost exclusively on tiny shrimp-like animals called krill. A single whale can consume up to four tonnes of krill per day during feeding season. Blue whale populations declined sharply due to commercial whaling in the twentieth century, and the species remains endangered today.

1. No animal in history has grown as big as the blue whale.
True False Not Given
2. An adult blue whale can weigh more than 200 tonnes.
True False Not Given
3. The word "immense" in the text suggests that blue whales are very large.
True False Not Given

MULTIPLE-CHOICE

Students read a text and answer a set of comprehension questions, selecting the correct answer from three options (A, B, or C). Distractors are plausible and often drawn from language used in the text itself, so students must read closely and critically rather than relying on keyword matching alone.

Sara has always loved cooking, but she never had time to practise because of her busy job. Last year, she decided to sign up for an evening cooking class at a local college. At first, she found it difficult to keep up with the other students, who had more experience. However, her teacher encouraged her to be patient and to focus on the basics. By the end of the course, Sara had learned to prepare several dishes and felt much more confident in the kitchen. She now cooks dinner for her family every weekend.

1. Why had Sara not cooked much before joining the class?
A She did not enjoy cooking.
B She did not have enough free time.
C She could not find a suitable class.
2. The phrase "keep up with" in the text most likely means ...
A to stay at the same level as others.
B to become better than the other students.
C to get to know the other students.
3. What is the main message of the text?
A Evening classes are a good way to meet new people.
B With patience and practice, people can learn new skills.
C Cooking is an important skill for everyday life.

Question Types

READ AND IDENTIFY SPECIFIC INFORMATION

These questions assess students' ability to locate and recognise explicitly stated information in a simple, clearly structured text. Students are not required to interpret or infer meaning; the correct answer can be found directly in the text using basic scanning skills.

Where are pangolins found, according to the text?

- A. Africa and Asia
- B. Europe and Africa
- C. Asia and Australia

What are pangolin scales made of?

- A. bone
- B. keratin
- C. shell

READ AND IDENTIFY DETAILS

These questions assess students' ability to recognize supporting or descriptive details that add information to the text. Unlike specific-information questions, these items focus on smaller pieces of information that contribute to understanding but are not the main idea.

Why do pangolins use their claws?

- A. to dig into insect nests
- B. to climb trees quickly
- C. to fight other animals

Why is curling into a ball useful for pangolins?

- A. it keeps them warm
- B. it protects them from predators
- C. it helps them sleep

READ AND IDENTIFY THE OVERALL MEANING

These questions assess students' ability to understand the overall message or general meaning of a simple text. Students must consider the text as a whole rather than focusing on individual details or sentences.

What is the main focus of the text?

- A. how pangolins hunt insects
- B. why pangolins are unusual and endangered
- C. how animals use scales

Which is the best title for the text?

- A. Animals That Eat Insects
- B. The Pangolin: A Protected and Unusual Mammal
- C. Night Animals of Africa and Asia

INFER THE MEANING OF UNKNOWN WORDS

These questions assess students' ability to work out the meaning of unfamiliar words related to concrete actions or objects by using contextual clues. Students are not expected to know dictionary definitions but to infer meaning from how the word is used in a familiar situation.

What does 'cover' in paragraph 3 mean?

- A. hide completely
- B. put something on top
- C. protect from rain

In paragraph 4, protected refers to being _____.

- A. kept safe by laws
- B. hidden from predators
- C. covered with scales

MAKE CONNECTIONS

These questions assess students' ability to make simple connections between the text and their own experience, background knowledge, or the world around them. The connection supports understanding of the topic or why the information is important.

Which problem in the text is similar to challenges faced by other endangered animals?

- A. losing protection from predators
- B. being hunted by humans
- C. difficulty finding food at night

Which idea from the text helps explain why animal protection laws exist?

- A. animals need food to survive
- B. human activity can threaten species
- C. insects are part of nature

MAKE INFERENCES OR PREDICTIONS

These questions assess ability to use information across the text to infer or predict what may happen next or how ideas are likely to develop. It follows the logical sequence of events or arguments, using cause-and-effect relationships, time markers, and connectors. The focus is on reasoned prediction and inference, not recall of stated facts.

What is most likely to happen next if plant-eaters increase but predators do not?

- A. plants may be eaten too quickly
- B. decomposers disappear
- C. producers make more sunlight

Based on the sequence described, what would happen first if decomposers disappeared?

- A. dead matter would build up
- B. predators would increase
- C. food chains would stop immediately
